In this table, it's easy to tell, but if we had a full table of all 29 minecraft mobs it would be really hard! We can use computers to find the value for us!

vLookup makes this easy!

vLookup runs on your computer and gives us information

If I give vLookup the table, and tell it I want the
“**Health**” of a “**Creeper**”, it will give me “**20**”
